

## **The Study Plan**

### **Academic Background and Personality**

My name is Théogène Manamfasha. I am an ICT engineering undergraduate from the University of Burundi. I got chance to study the course of Introduction to Research in which we have to select a topic to present. I have successfully dealt with “The Benefits of Farming and Livestock” ; the topic in which I got much interest.

Further, I am socially active, friendly, communicative, cooperative and industrious.

### **Reasons to study in China**

My main educational goal is to gain Master’s degree in Agriculture and Livestock. I hope that after completing master studies I would be able to take part in maximizing my country research technology in such fields to benefit its economy. I hope that I can gain more experiences in dealing with the situation, people, systems and demands which will be of great help in my future career.

By putting all these reasons together, it’s evident that China is an ideal place for me to do my Master’s degree.

Concluding it with high hopes, I believe this application will receive your favourable consideration and I will be happy to provide any additional information you may need.

I look forward to receive your reply.
